PROFESSIONAL SUMMARY

Dedicated QA Engineer | 2.1 Years Exp | Manual & Selenium Expert | Proven SDLC/STLC Record | Custom Frameworks, POM, Data-Driven | Jenkins, Maven, CICD Integration | API Testing (Postman, Rest Assured) | Detail-Oriented | Strong Bug Reporting | Bug-Free Product Delivery.

EXPERIENCE

Software Quality Assurance Analyst, 06/2023 - Present
Antino Labs - Bangalore, India

- Developed a comprehensive test strategy and plan for API testing.
- Utilized Postman, Rest Assured to simplify the testing process.
- Tested various HTTP methods (GET, POST, PUT, DELETE) and validated responses in different scenarios.
- Implemented positive and negative test cases to cover diverse use cases and edge conditions.
- Used assertions to validate the correctness of API responses, including status codes, headers, and payload data.
- Analyzed requirements and helped plan tests.
- Specialized in testing mobile applications on Play Store, iOS Store, and real devices.
- Used different testing methods for complete coverage.
- Collaborated with the development team for enhancements.
- Proficient in crafting and managing test cases using Google Sheets, tracking issues on Jira for efficient bug resolution.

Software Test Engineer, 10/2021 - 01/2023
Amdocs – Pune

- Proficient in SDLC and STLC methodologies, with a strong background in business flow analysis and strategic test planning.
- Designed and implemented automated test scripts using Selenium WebDriver and TestNG, resulting in a 30% reduction in manual testing efforts.
- Contributed to a custom automation framework, incorporating Page Object Model (POM) and data-driven testing.
- Integrated automated tests with Jenkins and Maven, enabling seamless CI/CD pipeline integration and expediting release cycles.
- Created API tests using Postman and Rest Assured.
- Ensured cross-browser/platform compatibility for consistent performance.
- Automated result monitoring and reporting with Extent Reports.
- Maintained and enhanced automation framework for effectiveness.

CERTIFICATIONS

- ☐ Certified Full stack Software Testing Course.
- ☐ Certified SDET Java Automation in Selenium Automation Testing on Udemy.
- ☐ Career Essentials in Generative AI by Microsoft and LinkedIn.

EDUCATION

BE- E&TC Engineering AISSMS Institute of Information Technology - Pune - 2021

CORE QUALIFICATIONS

- Manual Testing
- Selenium WebDriver
- TestNG Framework
- Core Java
- SQL Server, My SQL
- Postman/Rest Assured
- Linux
- Jenkins CI-CD
- Maven
- Jira
- Agile
- Microsoft Azure
- Git/Bitbucket
- Critical and Analytical Thinking
- Teamwork
- Corporate Communication

Projects

1. **AT&T US - Data Warehouse (ETL Testing, Database Migration)**

My Contribution:
I ensured the accuracy of AT&T's US Data Warehouse migration, conducting meticulous ETL testing. Introducing SQL-based table validation, I verified data integrity during migration from Snowflake to Teradata. Collaborating seamlessly with cross-functional teams, I orchestrated a smooth transition, minimizing downtime and optimizing performance.

2. **Vodafone Germany – CRM (Selenium Automation)**

My Contribution:
I played a key role in automating Vodafone Germany's CRM system, reducing manual efforts. Crafting and executing Selenium scripts, I collaborated closely with the development team, swiftly addressing defects. My efforts enhanced efficiency, contributing to comprehensive testing and faster release cycles.
